PROFESSIONAL SUMMARY

Senior front-end engineer with 6+ years of experience owning end-to-end front-end ecosystems for enterprise B2B platforms processing 7–10M+ transactions. Promoted from developer to Front-End Lead at BizKey Tech, where I architect and maintain 8+ interconnected platforms (ERP, CRM, CMS, HR, and more) as the sole front-end owner, design and ship public-facing web and mobile products for clients, mentor junior engineers, and drive cross-functional product delivery. Deep expertise in React, TypeScript, and Flutter, with emerging specialization in agentic AI integration for enterprise workflows. BCIT graduate, top of class (96%).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart, Python, C#, C

Front-End: React, Redux, React Router, Vite, Flutter, PWA, Swift, Android, MVVM, GetX, Bloc, Riverpod

Styling: CSS / SCSS, Emotion, CSS Modules, Material UI, Tailwind CSS, Bootstrap

Back-End: Node.js, Flask, Django, Entity Framework, REST APIs, MQTT / Solace, Clean Architecture

Databases: MySQL, MS SQL, MongoDB, SQLite, IndexedDB

Testing & Performance: Jest, Cypress, React Testing Library, Lighthouse, Web Vitals

Payments & Wallets: Stripe SDK, Apple Wallet / Google Pay (Tap to Pay), PayPal

AI & i18n: Agentic LLM design, LLM-integrated interfaces, i18next, flutter_intl

DevOps & Tools: Git, GitHub Actions, Docker, Jira, Trello, Agile / Sprint architecture, CI/CD pipelines

PROFESSIONAL EXPERIENCE

Front-End Lead / Senior Software Developer · **BizKey Tech** Feb 2020 – Present Vancouver / Langley. Full-time

- **Sole architect and owner of the entire front-end ecosystem** across 8+ interconnected B2B platforms—ERP, CRM, CMS, IMS, HR, FMS, dynamic QR/barcode system, and ticketing—processing 7–10M+ transactions and serving an actively growing enterprise client base.
- **Architected a multi-tenanted ERP platform** spanning 150+ features and pages in React and TypeScript with modular design patterns, reducing development overhead by 40% and underpinning all client deployments on web and native mobile (Flutter).
- **Promoted from developer to Front-End Lead;** trained and mentored 6 interns across React and Flutter over 6-month rotations, conducting code reviews and delivering structured feedback — 2 former interns now work full-time as software developers in Vancouver.
- **Led cross-functional teams of 2–3 engineers** on focused product builds including CRM (web + PWA) and BizHR (web panel + native app), personally implementing the front-end and coordinating back-end delivery to ship full-stack features on schedule.
- **Delivered a company-wide internationalization overhaul** across ~1,000 files, engineering a multi-language translation architecture (EN/FR/ES) with locale-aware DateTime and a scalable pipeline enabling new language additions in under one day — directly unlocking French-Canadian and Latin American markets where prospective clients had been awaiting localization support.
- **Designed, developed, and maintained 6+ public-facing web and mobile products** for BizKey and its clients — including bizkeytech.com (company platform), chtp.com (custom e-commerce with a modern, technically sophisticated landing page), bizkey.ai (AI product landing page), zippet.ca (cross-platform e-commerce with PayPal, loyalty rewards, iOS/Android via Flutter), megarebar.com (brand site with SEO optimization), and total-selfstorage.com (full brand identity: UX, design, logo, letterhead, and website) — delivering end-to-end from UX and branding through deployment and ongoing maintenance.
- **Engineered an AI-powered ERP conversational interface** following ChatGPT-style interaction patterns, enabling natural-language data queries and task execution to reduce repetitive navigation overhead for enterprise end users.

- **Designed and shipped BizInventory**, an Inventory Management System with native camera-based barcode and QR scanning, deployed to both the App Store and Google Play and used daily by warehouse operations teams.
- **Standardized a company-wide design system** with reusable component libraries, dynamic theming, and adaptive color schemes, accelerating front-end development cycles by 30% across all product lines — leveraging code splitting, lazy loading, dynamic caching, and dynamic injection to minimize server load and optimize performance.
- **Presented platform demos at 3 national industry conferences** to 200+ attendees across Canada, generating 10+ qualified enterprise leads and strengthening BizKey Tech's brand recognition in the B2B software market.

Software Developer / Consultant · **Fardad Mana Development & Trade Group** *Apr 2025 – Present*
Iran (Remote) · Full-Time

- **Designed and deployed a proprietary agentic AI vendor discovery system** automating identification of qualified Chinese suppliers—replacing a multi-week manual research process. The solution achieved company-wide adoption and became a standard R&D tool for every new project.
- **Authored the company's foundational internal software architecture** for all future web and mobile development, establishing technology stack standards, structural patterns, and development methodologies aligned with industry best practices.
- **Led full-stack development and infrastructure operations** including back-end services, RESTful API design, server deployment, and database optimization across multiple production systems.
- **Consulted senior leadership on strategic technology adoption** including company-wide AI agent integration and agentic workflow design, influencing the direction of the company's digital transformation roadmap.

EDUCATION

Computer Systems Technology Diploma (Predictive Analytics) · **BCIT, Vancouver**

- **Graduated top of class** with a 96% overall average; awarded the W. Cameron McKenzie Memorial Scholarship for academic excellence.
- **Co-founded and led the BCIT Computing Club** from inception to 400+ active members, demonstrating initiative in community building and technical leadership.
- **Built instructor-endorsed capstone web applications** in collaborative teams of 4–5, including a self-assessment platform and a Coursera-inspired learning hub.

LEADERSHIP & COMMUNITY

- **Conference Speaker:** Delivered technical product showcases at 3 national industry conferences across Canada to audiences of 200+ attendees.
- **Club Founder:** Co-founded the BCIT Computing Club, growing membership to 400+ and organizing technical workshops and networking events.
- **Mentorship:** Trained 6 interns over structured 6-month rotations across React and Flutter, conducting code reviews and accelerating professional development — 2 former interns now employed full-time as software developers.
